Evoke360

Improving Risk Adjustment Accuracy for Financial Impact

Evoke360 is a comprehensive value-based care, payer-agnostic population health management solution that aligns the payer, provider and patient with one view and one goal: proactively close care gaps to ensure a complete health status that facilitates an optimal care plan that improves health outcomes.

Evoke360 Risk Adjustment Insights

Evoke360's real-time data insights are captured using interoperability with disparate sources, allowing 360-degree visibility into the patient's health status.

Evoke360 Data Sources

| Electronic Health Records (EHRs) | Health Information Exchanges (HIEs) | Claims | Laboratory | Pharmacy | Hospital |

Intelligent analytics are used to prioritize high-risk patients to assist in the accurate and proactive identification of care gap closure opportunities and suspected conditions. Evoke360 generates suspect lists to manage retrospective, concurrent and prospective clinical programs. It also supports in-home evaluation results, impact reporting and risk adjustment factor (RAF) score prediction.

Evoke360

Improving Risk Adjustment Accuracy for Financial Impact

Evoke360's Risk Adjustment Benefits

- High-risk patient prioritization using analytics
- Manages current, projected and suspected conditions via risk adjustment engine
- Tracks HCC revalidation opportunities
- Calculates and forecasts RAF scores
- Improves confidence in RADV audits
- Manages utilization with EHR and HIE integration for real-time admissions, discharges and transfers (ADT) data feeds
- Drill-down patient and practice-level dashboards

- Bi-directional data flow for automated EHR chart and continuity of care document (CCD) extracts
- Manages provider relationships and engagement
- Financial, key performance indicators (KPI) and practice performance dashboards and reporting
- Financial Impact Reporting
- Managed service organization (MSO) and medical group performance visibility
- Improves collaboration across teams

EHR Connectivity at the Point of Care

Evoke360 integrates with any web-based EHR to ease provider administrative burden. CareBook Connect, an add-on browser extension, allows providers to simultaneously document within their EHR and the solution.

Reducing Administrative Burden

Evoke360 can be used across the organization and eliminate the use of multiple platforms. With an *87% provider engagement rate*, the solution effectively improves workflows, documentation, collaboration and patient outcomes, driving risk adjustment score accuracy.
